

Using the KL25Z_ECE395 Project_v2 template in Keil version 5.13

1/28/2015 - DJH

After importing the make the following changes before building the code.

1. Navigate to Project >>> Option for Target 'C – PE Micro – Ram' dialog window.
2. In the 'Target' tab, set Xtal (MHz) to 48, IROM1 to 0x1FFFF000/0x1000 and IRAM1 0x20000000/0x3000.

3. Search for the path to the file core_cm0plus.h on your system. In the 'C/C++' tab add the file location to the 'Include Paths' field.
